porcelain **4TOP**
REVOLUTIONARY SURFACES FOR COUNTERS

EVOLUZIONE SOTTILE *design*

What is *porcelain*4TOP?

Is the result of a **revolutionary italian technology** that allows us to produce **fullsize ultracompact porcelain surfaces**, featuring body and surface continuity. Only composed of natural raw materials, exposed to an extreme temperatures firing process, that gives to ceramic counters incomparable characteristics of **strength, resistance** and **durability**.

Advantages

What are the advantages of choosing our porcelain slabs for work tops applications?

high resistance to heat and to high temperatures

(hot pots can be placed directly on it).

high resistance to mould, mildew & fungus

(porcelain is nonporous, water absorption is less than 0,5%).

high resistance to stains and to cleaner detergents

(the glaze on the surface is a never ending protection).

high resistance to thermal shock

(does not emit harmful substances when heated).

high resistance to UV rays

(can be used outdoor).

waterproof, frostresistant and skratproof

Fired glaze on porcelain surfaces provides outstanding stain and abrasion resistance counters, which does not ever need to be sealed.

very easy to clean and maintain.

Work surfaces are 100% hygienic and suitable for contact with any kind of food.

colors are durable over the time,

even when outdoor installed. Slabs does **not contain any resin**.

Applications

This innovative material is great for any application, anywhere, **indoor and outdoor areas, such as counter tops, working tables, vanities, stairs, shower walls, fire places, walls cladding, heavy traffic floor or exterior facades, and wherever high quality, sanitary and low maintenance are required.**
